

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) A compound of the general formula I:

or pharmaceutically acceptable salt thereof, wherein V is a non-peptidic vector having affinity for the Angiotensin II receptor and is selected from Losartan, Valsartan, Candesartan, Eprosartan or derivatives thereof, L is a bond, a spacer or a linker moiety, and Z represents a chelating agent of Formula II carrying an imageable moiety of a metallic radionuclide M

(II)

where:

each R^1 , R^2 , R^3 and R^4 is independently an R group;

each R group is independently H or C_{1-10} alkyl, C_{3-10} alkylaryl, C_{2-10} alkoxyalkyl, C_{1-10} hydroxyalkyl, C_{1-10} alkylamine, C_{1-10} fluoroalkyl, or 2 or more R groups, together with the atoms to which they are attached form a carbocyclic, heterocyclic, saturated or unsaturated ring.

~~A moiety detectable in an in vivo imaging procedure of a human or animal body.~~

2. (Cancelled)

3. (Cancelled)

4. (Previously presented) A compound as claimed in claim 1, where Z is a chelating agent of formula e carrying an imageable moiety M

5. (Cancelled)

6. (Cancelled)

7. (Original) A pharmaceutical composition comprising an effective amount of a compound of general Formula (I) or a salt thereof, together with one or more pharmaceutically acceptable adjuvants, excipients or diluents for use in enhancing image contrast in *in vivo* imaging or for treatment of a disease.

8. (Cancelled)

9. (Previously presented) A method of generating images of a human or animal body involving administering a contrast agent to said body, and generating an image of at least a part of said body to which said contrast agent has distributed, characterised in that said contrast agent comprises a compound as claimed in claim 1.

10. (Previously presented) A method of generating enhanced images of a human or animal body previously administered with a contrast agent composition comprising a compound as claimed in claim 1, which method comprises generating an image of at least part of said body.

11. (New) A compound as claimed in claim 1, wherein M comprises ^{67}Ga , ^{111}In , $^{81\text{m}}\text{Kr}$, ^{99}Mo , $^{99\text{m}}\text{Tc}$ and ^{201}Tl .
